

**PALM BEACH COUNTY
TRAFFIC DIVISION
HISTORICAL ROADWAY TRAFFIC COUNTS**

CURRENT YEAR – 2021

DO NOT USE 2021 COUNTS FOR PREPARING TRAFFIC IMPACT STUDY (TIS) REPORTS

Use of 2020 or earlier counts (if 2020 counts are not available) is required for preparing TIS reports until further notice

2020 counts, as published on the Traffic Division web site, are believed to be unaffected by COVID related travel impacts. Due to recent improvements in COVID situations and resulting increase in travel and gradual normalization of daily business activities, 2021 collected counts still seem to have residual COVID related travel impacts. Since traffic volume projections are the basis of a TIS, it will be inappropriate to use base counts that are not “typical”.

This document was developed as supporting data for use in traffic impact studies seeking to demonstrate compliance with Article 12 of the Unified Land Development Code, the Traffic Performance Standards. This document shows historical peak season Daily Traffic Counts from 2016 to 2021, as well as Peak Directional and Two-Way Counts for 2021, if available. Compound growth rate in %, based on past 3 years of Daily Traffic Counts is also shown for each station.

Please note that the counts, in most cases, reflect a snapshot of just one full day mid-week volumes. Though great caution was exercised to avoid impacts of construction/road closures in the immediate vicinity of these traffic count locations, there is no guarantee that a faraway event has not influenced the counts indirectly. Engineering judgment should be exercised in the use of counts where growth rates are out of the ordinary, particularly in cases where the growth rates are negative, too high, etc. For a lengthy build out date (generally more than 5 years), use of an area wide growth rate might be more appropriate. Consult Article 12 of the ULDC regarding use of traffic counts and historical growth rates in the traffic impact studies.

Palm Beach County Historic Peak Season Traffic Counts (2016-2021)
